

BULLET PLUG®

# The New Bullet Plug® RCA Connector - improves the performance of interconnects, digital and video cables... dramatically!

Revolutionary return pin directs electron flow to/from the side wall of RCA sockets.

## Read what the experts say...

"The Bullet Plug® has, overnight, leapfrogged the performance available from existing phono plugs, and disappeared over the horizon. The benefits are huge, HUGE! They transform the performance of affordable cables, and I can't wait to hear them on serious leads."

**Roy Gregory -**  
Editor Hi-Fi Plus Issue 12  
July/August 2001

"In 100 per cent of the cases, the Bullet Plug® sounded cleaner, with an enhanced stability, and a more full and three dimensional sound. We were prepared that the Bullet Plug® would have a more detailed sound, and even though it sounded both purer and provided essential benefits in detailing - it was the fact that it gave a fuller sound with more solidity - that struck us most."

**Mats Meyer - HiFi & Musik**  
(Sweden) January 2002

"There was a cleanness to the sound that reminded me of hard-wiring."

**Jimmy Hughes -**  
Hi-Fi Choice December 2001

"My best guess is that once word gets out how good these are, DIY guys from around the world will be swearing by them."

**Steven R. Rochlin -**  
www.enjoythemusic.com

"Some older cables that are no longer current, or have been replaced by newer designs, enter into their second life and offer sound qualities that you never imagined! Conclusion: buy them - solder them properly, or have cables done professionally and be open to a new experience. It is that simple."

**Helmut Rohrwild - HiFi & Records**  
(Germany) December 2001

"Now the complete signal seems to be intact, has speed and sounds tight, which means that the phase is correct. A weakness of my active speaker system, which I attributed to an incorrect adjustment, was entirely gone. The improved signal transmission has its effect on every recorded instrument in all sorts of music."

**Soundfountain - Audio & Music Bulletin** (The Netherlands)

**Bullet Plug® connectors - available from all good Hi-Fi and Home Theater Dealers.**
